

# SWISSLAB

## Histopathology

*The SWISSLAB histopathology module provides effective data and workflow management for the modern histopathology laboratory.*

SWISSLAB's comprehensive solution integrates the various fields of work in histopathology into a single complete central system, thus facilitating efficient diagnoses on the basis of microscopic tissue and cellular analyses.

Internal laboratory procedures can be adjusted individually thanks to flexible configuration options, thus ensuring that processes run smoothly. In addition, the dictation support guarantees optimum integration into other speech systems and offers the option of data retrieval from all work stations.

## *Your benefits at a glance*

### Workflow-based process sequences

- View processing orders status any time on the SWISSLAB order monitor
- Efficient data management and process sequences organisation

### Integration and specialisation

- Full integration into the SWISSLAB laboratory information system (LIS)
- Consideration of special customer requirements in histology, PCR, IHC laboratories

### Optimal dictation support

- Integrated dictation software interface, such as MSB easy, SpeaKING Dictat
- Possibility of other speech system integration
- Completed dictations can be immediately called up from each work station

### Expert opinion compilation

- Physician dialogue for a complete overview of a patient's previous findings
- Reports and dictations can be compiled directly
- Easy design of professional expert opinion letters via connection to the SWISSLAB document database

### Compilation of reports

- Version-safe document compilation in Microsoft Word format
- Individual formatting options, text building blocks and error correction

### Communication

- Expert opinions or consultation letters can be automatically sent to pre-defined senders, e.g. fax
- Order recording with SWISSLAB LAURIS order communication system

### Billing

- Recording of all billing and accounting data
- Recording of services rendered in the laboratory and at the physician level
